

Appendix J - Interface Inventory

Interface Name	Interface Description	Business Area	Status	Domain
Driver License Verification Request	Send request to the Department of Safety to verify the Driver License and ID Card number provided by the vehicle owner/registrant.	Vehicle Title & Registration	Existing	Internal
Driver License Verification Response	Receive response from the Department of Safety which may include if the Driver License and ID Card number is valid, active status and other relevant customer demographic information.	Vehicle Title & Registration	Existing	Internal
Address verification (USPS)	Software verifies addresses provided by customers. This is a desired interface or needs to be integrated with the vendor's software.	Vehicle Title & Registration	Future	Internal
National Motor Vehicle Titling Information System (NMVTIS)	The SDDOR Motor Vehicle system interacts in real-time with the National Motor Vehicle Title Information System (NMVTIS) to send and receive, new title information, perform stolen vehicle check, send updates to the vehicle ownership information, as applicable. The state interface is currently through AAMVA UNI and will need to be implemented using restful web service.	Vehicle Title & Registration	Existing	External
ITI Fulfilment Center System - Print and Mail	The registration and plate information along with the customer (name and mailing address) information is sent ITI fulfilment center system to be printed and mailed on behalf of SD-DOR Motor Vehicle division. This interface also include information related to all specialty plates and registration, all re-issue that are done using online and using the kiosk.	Vehicle Title & Registration	Existing	External
ITI Fulfilment Center System - Inventory Production	The information on the inventory items such as plates, stickers, decals to be manufactured for upcoming year is sent to ITI fulfilment center system. This is a nightly batch job.	Vehicle Title & Registration	Existing	External
ITI Fulfilment Center System - Inventory Distribution	The information on the inventory items such as plates, stickers, decals to be shipped to various transaction processing centers (County Treasurer office and central office) and maintained at the ITI fulfilment center is sent on a period basis.	Vehicle Title & Registration	Existing	External
ITI Fulfilment Center System - Tracking Information	ITI sends tracking information back to DOR-MVD system. Some information is recieved daily and some information is received weekly.	Vehicle Title & Registration	Existing	External
ORC (Obligatory Recovery Center) - Collection Center	The information on the customer who owes money to other agencies and whose registration is blocked, is received on periodic basis. This is a nightly batch job.	Vehicle Title & Registration	Existing	External
VINtelligence (RL Polk)	Vehicle information provided to a VIN Vendor (e.g., Polk). VIN Vendor provides a VIN information back to the Agency. Currently VINtelligence access is through a vendor system (IHS Markit).	Vehicle Title & Registration	Existing	External
SD Citizen Portal	The SDDOR Motor Vehicle system shall interact with the SD Citizen Portal to send information related customer and their vehicles. It is envisioned that the user/customer, who logs into SD Citizen Portal, to be notified of information regarding renewals, actions, etc. that need to be accomplished on the SDDOR Motor Vehicle system. When a user/customer logs into SD Citizen Portal, that system would interface via API to retrieve relevant information.	Vehicle Title & Registration	Existing	External
Environmental Protection Agency	DOR Motor Vehicle system may send data and receive data in future on types of vehicles (electric/gas etc.) and MPG information, as desired. This details will need to be worked out.	Vehicle Title & Registration	Future	External
SSN Verification	Customer provided SSN is verified using this interface. Note: The system shall mandate that the out of state customer provide of their SSN for verification to DOR agent.	Customer	Future	External
FEIN Verification - Secretary of State	Business Customer provided FEIN is verified using this interface. This may be verified though the Secretary of State system.	Customer	Future	External
CEDAR - Business Registration	SDDOR Motor Vehicle division may provide and/or receive business license and tax information from the SDDOR Business Tax division/system. currently, there is not interaction between CEDAR and Motor Vehicle system SDCARS.	Dealer License	Future	Internal
Deceased File	Inbound deceased customer file received from Vital Statistics division, SDDHS (South Dakota Department of Human Services) on a periodic basis. Currently, this information is received from the DL/ID system and there is no direct interaction to receive the deceased file. The agency would like a copy of the deceased file that is received by the Department of Public Safety to update the DL/ID information.	Vehicle Title & Registration	Future	Internal
Banks	SDDOR Motor Vehicle division receives file with remittances, returned check information. Currently, these files have to be imported as there is no direct interface to receive these files.	Finance	Future	External

Appendix J - Interface Inventory

Interface Name	Interface Description	Business Area	Status	Domain
FMIS (State-wide)	State-wide accounting system to send financial data. Currently there is no direct connection to this system, hence the agents has to perform manual data entry to this system.	Finance	Future	Internal
Credit Card Vendor	Approved SDDOR Motor Vehicle division credit card vendor.	Finance	Existing	External
Kiosk	Kiosks at various County Treasurer and Agency offices to perform Vehicle Title and Registration Transactions. The current interface is a web service with ITI transactions which load right away into the Motor Vehicle system. The payment are processed through bank, but are not not immediately available.	Vehicle Title & Regsitration	Existing	External
Carfax	Vehicle information provided to Carfax. This information is sent as a batch file using the file transfer (SFTP) location.	Vehicle Title & Regsitration	Existing	External
Experian	Weekly data extracts are provided to Experian. This information is sent as a batch file using the file transfer (SFTP) location.	Vehicle Title & Regsitration	Existing	External
MCC System	Vendor supported IRP (Internation Registration Program) and IFTA (International Fuel Tax Agreement) system which exchanges data with the SDDOR Motor Vehicle system for vehicle title, regsitration, apportioned plates and fees collected data. Currently, the information exchange happens in batch mode and state envisions to exchange information in real-time using a web service interface.	Vehicle Title & Regsitration	Existing	Internal
HVUT Data	The SDDOR Motor Vehicle system shall interact MCC system to exchange Heavy Vehicle Use Tax (HVUT).	Vehicle Title & Regsitration	Future	Internal
ELT System	The Electronic Lien and Title (ELT) System gives you the capability to electronically exchange lien and title information between a lienholder and a jurisdiction's motor vehicle agency. There is existing API for interacting with the legacy system and file transfer happens through the SFTP protocol.	Vehicle Title & Regsitration	Existing	External
ERT (Electronic Title and Registration) Vendors	ERT software provides web capability for customers to transmit applications for titles and registration of motor vehicles, renewal of motor vehicle registrations, creating and removing liens from motor vehicle records, applying for salvage or junking certificates, and issuing registration plates and stickers by motor vehicle dealers, financial institutions and retail merchants.
